

# SA U.S. VALUE FUND

As of 3/31/2023

The Fund's goal is to achieve long-term capital appreciation. The Fund pursues its goal by generally investing in a broad and diverse group of readily marketable equity securities of large and mid cap U.S. companies listed on a securities exchange in the United States that is deemed appropriate by the Sub-Adviser, that the Sub-Adviser believes are "value" stocks at the time of investment. The Sub-Adviser generally considers large and mid cap companies to be companies whose market capitalizations generally are either in the highest 90% of total market capitalization or companies whose market capitalizations are larger than the 1,000th largest U.S. company, whichever results in the higher market capitalization threshold. Under the Sub-Adviser's market capitalization guidelines described above, based on market capitalization data as of August 31, 2022, the market capitalization of an eligible company would be approximately \$8.2 billion or above. This dollar amount will vary due to market conditions. The Fund has a non-fundamental investment policy that, under normal circumstances, it will invest at least 80% of its net assets in U.S. securities.

**Investing involves risk, principal loss is possible. The risks associated with investing in stocks and overweighting small company and value stocks potentially include increased volatility (up and down movement in the value of your assets) and loss of principal.**

Effective April 1, 2022, the Fund's primary benchmark changed from the Russell 1000 Value Index to the Morningstar US Large-Mid Cap Broad Value Index.

The Morningstar® U.S. Large-Mid Cap Broad Value Index<sup>SM</sup> (Morningstar US Large Mid Brd Val TR USD) targets U.S. equity securities in the cheaper half of the U.S. large and mid-cap markets, as measured by Morningstar's style score. The Index is calculated on a total return basis and is measured in U.S. dollars.

The Russell 1000 Value Index (Russell 1000 Value TR USD) measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values. This index is unmanaged and reflects reinvested dividends and/or distributions, but does not reflect sales charges, commissions, expenses or taxes.
